

An Open Letter to Rose Medical Center Patients from Your Physicians

As physicians who practice at Rose Medical Center, we have no higher priority than preserving the trust you place in us. Recent events may have placed the safety and peace of mind of some of our patients at risk. We want you to know that we are rededicating our energy, alongside the staff and leadership of Rose, to ensure you receive the highest quality, most compassionate, and safest care that you, our patients, have come to expect from our hospital.

We applaud Rose's aggressive efforts to notify and test all potentially exposed patients. We encourage any patient who has received a letter from Rose to get tested as soon as possible. The test is free, highly accurate, and confidential. The results will help us assure your well being, get you the care you may need, and put your concerns to rest.

As your physicians, we value the bond of trust you place in us when you choose us as your health-care provider. We will not let the admitted criminal actions of one former employee threaten that bond. We understand our patients need to have complete faith in the safety of their hospital. We believe in Rose and the state-of-the-art, compassionate care it provides.

We, the Medical Staff of Rose Medical Center, commit to work, in partnership with the dedicated hospital staff, to make and keep Rose the unique and special community resource that it is. We will proudly continue our 60 years of commitment to you, the community we serve.
